

Full-Stack Developer (w/m/d)

EPTechnologies, a leading company in the field of marine electric propulsion, is extending its team.

We are looking for a person that believes in electric innovation, 'silent dreams' on water and a greener marine industry.

We are based in Hamburg / Reinbek

Full-Stack Developer (w/m/d)

Mission tasks:

- Programming and development of electric drive solutions mainly on PLC level
- Service jobs on electric drive solutions
- Start up of electric drive solutions
- Drawing of electrical circuits practical and CAD

We expect:

- PLC / SPS programming, Wago e-cockpit to ISO 61131-3 & C/C++ is an advantage.
- Communication ports like Ethernet / CAN / RS 232 / RS 485 / and analog are your homeland.
- You like to program and parameter systems like BMS / HMI / controllers and so on.
- Solid electric education, preferable with a higher diploma, no master needed.
- Must be able to work hands-on, be self-driven and a problem-solver.
- Fluent in English and German is a must.
- Flexibility to work 30% off site at the customer. Willingness to travel.

What we offer:

- New technologies and challenges, a lot of room for self-development.
- Competitive salary
- Growing company
- A motivated and fast-moving team
- A business where we all talk together, have weekly breakfast together in order to exchange ideas and a flat hierarchy.
